INTRODUCTION

This document updates the report published by the Office of Energy Research and Development (OERD) in June 1979. The listing of the projects has been compiled by OERD from information supplied by the Governments and Agencies of the Provinces and Territories Estimated expenditures are given to indicate the level of activity for each project. They are also summarized by R&D area and Province in the Summary Tables A, B, C and D.

In order to provide a common base of reporting, OERD has identified in Table I expenditures on energy research and development (R&D) which are solely provincial and territorial; not included are the federal share of cost-shared agreements and the share of R&D funding provided by the provincial power utilities. Projects funded by these utilities are listed in Table IV. Energy Resource assessment work is not strictly energy R&D. Projects carrying out energy resource assessment activities have been listed in Table II.

Many projects reported could not be classified as pure R&D projects. The Ministry of State for Science and Technology 3 limits R&D work to "creative work undertaken on a systematic basis to increase the stock of scientific knowledge and technology". Yet, related scientific activities (RSA), including scientific data collection, scientific information services, testing and standardization, and feasibility, operations and policy studies, are sometimes difficult to dissociate from R&D work, and often largely contribute to the advancement of R&D. To accommodate these elements inherent in technical and scientific activities, all projects including R&D and/or RSA have nevertheless been compiled in the main tables of the second part of this document. Only those projects dealing with high capital cost demonstration and commercialization have been excluded from the main tables; they are grouped in Table III. Grey areas exist here, particularly with respect to prototypes and pilot projects. Some demonstration projects (or part of them) are undertaken under federal-provincial bilateral agreements4; such projects frequently constitute a large fraction of expenditures reported by Provinces and Territories.

OERD gratefully acknowledges the assistance of the Governments of the Provinces and Territories and various Power Utilities, which are listed with the names of contact persons in Appendix A.

A list of selected reports, available from Provincial and Territorial governments and Agencies, is included in Appendix B.

Footnotes (ctd):

- ² An Accession List of publications, available from these Governments and Agencies, as well as from power utilities and other sources, is available upon request from OERD. This Accession List is updated several times a year.
- Federal Science Activities 1980-81, Ministry of State, Science and Technology, 1980.
- ⁴ Principal amongst these are the Alberta-Canada Energy Resources Research Fund (ACERRF) and the Federal-Provincial Conservation and Renewable Energy Development Agreements (CREDA's).

ACERRF is funded at a level of \$96 million over 6 years (1976-82), and focuses on fossil fuel research of direct interest to Alberta and the

western provinces.

The federal financial participation in CREDA's over the five year period (1979-84) is authorized at \$133 million, the provincial-territorial involvement totals \$96 million and these together with the financial participation of the proponents bring the program total to approximately \$300 million.

Report of the Interim Board of Directors: (1966-67)

Report of the Board of Directors, Annual Report of the Chief Research Officer: 1967-68 to 1974-75. (Free if still available).

Report of the Board of Directors, Annual Report of the Manager: 1975-76 to 1979-80. (Free if still available)

PRI News Letters: Numbers 1-22. (Free if still available).

Research Programs of PRI: RP-1 by N. Mungan (Feb. 1968). (Free if still available).

Progress Reports of PRI: (Free if still available).

PR-I (October 1968) to PR-XXV (November 1980)

Research Reports of PRI: (RR 36 \$60 each, other reports \$10 each)

- RR-1 (March 1968), "Programmed Mobility Control in Polymer Floods", by N. Mungan.
- RR-2 (April 1968), "Permeability Reduction Due to Salinity Changes", by N. Mungan.
- RR-3 (March 1969), "Rheology and Adsorption of Aqueous polymer Solutions", by N. Mungan.
- RR-4 (June 1969), "Reservoir Statistical Analysis", by A.C.A Hope.
- RR-5 (July 1969), "An Experimental Study of Fluid-Fluid and Fluid-Fluid-Solid Interfaces", by F.G. McCaffery and N. Mungan.
- RR-6 (Oct. 1979), "Retrograde Condensation in Porous Media", by N.R. Morrow, R.A. Purvis and P.M. Sigmund.
- RR-7 (Jan. 1971), "Wettability and Capillarity in Porous Media", by N.R. Morrow and N. Mungan.
- RR-8 (March 1971), Dispersion in Porous Media", by M.J. Goss.
- RR-9 (April 1971), A Review of Diffusion in Liquids and Dense Gases", by Hing Y. Lo and P.M. Sigmund

- RR-10 (July 1971), "Diffusion Coefficients for the Liquid System n-Heptane n- Dodecane", by Hing Y. Lo.
- RR-11 (July 1971), "Rehological Model for Ionic Polyacrylamide Solutions", by N. Mungan.
- RR-12 (Sept. 1971), "The Measurement of Interfacial Tensions and Contact Angles at High Temperature and Pressure", by F.G. McCaffery.
- RR-13 (Oct. 1971), "Wetting and Adsorption Studies of the n-Dodecane-Aqueous Solution-Quartz System", by F.G. McCaffery and P.J. Cram.
- RR-14 (March 1972), "Dispersion Measurements in Porous Media", by M.J. Goss.
- RR-15 (June 1972), "Displacement Studies in Dolimite with Wettability Control by Octanoic Acid", by N.R. Morrow, P.J. Cram, and F.G. McCaffery.
- RR-16 (Nov. 1972), "Diffusion Coefficient in Binary Liquid n- Alkane Systems", by Hing Y. Lo.
- RR-17 (Dec. 1972), "Wettability Studies with Non-Hydrocarbon Constituents of Crude Oil", by P.J. Cram.
- RR-18 (Nov. 1972), "Oil Well Coning", by T. Kaneko and N. Mungan.
- RR-19 (April 1972), "Temperature Effect on Relative Permeabilities and Residual Saturations", by Hing Y. Lo and N. Mungan.
- RR-20 (May 1973), "Some Ppractical Aspects of Coning Simulation", by N. Mungan, T. Kaneko, K. Aziz, and A. Settari.
- RR-21 (June 1973), "Binary Molecular Diffusion in Dense Gas Mixtures:
 The Methane-Propane and Methane-Nitrogen Systems", by P.M.
 Sigmund.
- RR-22 (Jan. 4, 1974), "The Effects of Surface Roughness on Contact Angle", by N.R. Morrow.
- RR-23 (Jan. 16, 1974), "Capillary Phenomena in Uniformly Wetted Porous Media", by N.R. Morrow.
- RR-24 (Feb. 8, 1974), "Dispersion Measurements for Miscible Flood Design", by M.J. Goss.
- RR-25 (April 3, 1874), "The Measurement and Prediction of Molecular Diffusion for Estimating Mixing Effects in Petroleum Recovery Processes", by P.M. Sigmund.
- RR-26 (July 25, 1974), "A Theoretical and Experimental Coning Study", by N. Mungan.

- RR-27 (Nov. 21, 1974), "Estimating Multicomponent Diffusion and Dispersion for Petroleum Recovery Processes", by P.M. Sigmund.
- RR-28 (April 3, 1975), "Revaporization Recovery of Retrograde Condensate by Dry Gas Injection", by P.M. Sigmund.
- RR-29 (June 23, 1975), "Bibliography of Thermal Methods of Oil Recovery", by Hing Y. Lo.
- RR-30 (Dec. 2, 1975), "Aqueous Polymer Solution Floods", by Walter P. Shyluk.
- RR-31 (Aug. 1976), "Laboratory Study of Water Coning in a Layared Model", by N. Mungan.
- RR-32 (Nov. 1976), "The Effect of Interfacial Tension on Oil-Water Relative Permeabilities", by Hing Y. Lo.
- RR-33 (May 1977), "Pore Space Characterization and Displacement Studies of Alberta Carbonate Reservoir Rocks", by F.G. McCaffery, P.M. Sigmund, and J.E. Fosti.
- RR-34 (May 1977), "An Improved Procedure for Determining the Relative Permeability Characteristics of Heterogeneous Porous Media", by P.M. Sigmund and F.G. McCaffery.
- RR-35 (Oct. 1977), "Mobilization of Entrapped Ganglia", by J.P. Batycky and A.K. Singhal.
- RR-36 (May 1978), "A Treatise on Hydrocarbon Recovery from Carbonate Reservoirs", by F.G. McCaffery, P.M. Sigmund and N.C. Wardlaw. \$60 each.
- RR-37 (Sept. 1978), "Phase Behavior and Displacement Studies of Carbon Dioxide-Hydrocarbon Systems", by J.I. Lee and P.M. Sigmund.
- RR-38 (Nov. 1978), "Physical Model Study of Inverted Seven Spot Steamfloods in a Pool Containing a Lloydminster Type Heavy Oil", by A.K. Singhal.
- RR-39 (Nov. 1978), "Polymer Solution Degradation and the Meaning of Screen Factor". by J.P Batycky and V.K. Masata.
- RR-40 (March 1979), "Effectiveness of Carbon Dioxide Displacement Under Miscible and Immiscible Conditions", by J.I. Lee.
- RR-41 (Feb. 1979), "Dependence of Residual Oil Mobilization on Wetting and Roughness", by J.P. Batycky.
- RR-42 (April 1979), "Adsorption of Pure Surfactant and Petroleum Sulfonate at the Solid-Liquid Interface", by J. Novosad and L. Baxter.

- RR-43 (May 1980), "Salinity and Hardness Tolerant Microemulsion Formulations", by B.B. Maini and J.P. Batycky.
- RR-44 (May 1980), "Simulation of Miscible Displacement in Full Diameter Carbonate Cores", by J.P. Batycky, B.B. Maini and D.B. Fisher.
- RR-45 (June 1980), "Interpreting Capillary Pressure and Rock Wetting Characteristics from Unsteady-State Displacement Measurements", by J.P. Batycky, F.G. McCaffery, P.K. Hodgins and D.B. Fisher.

Research Notes of PRI (Free of charge)

- RN-1 (Sept. 1970), "The Influence of Contact Angle on Surface Tension Measurements by the Ring Detachment Method", by P.J. Cram and M.J. Haynes.
- RN-2 (Feb. 1971), "The Influence of Wettability and Laboratory Handling on Relative Permeability Measurements Using Reservoir Fluids", by N. Mungan.

Nova Scotia Department of Mines and Energy

The Wood Book

The Homeowner's Wood Burning Manual or Answers to Your Burning Questions (1SBN 0-88871-002). Non-technical information presented in a question and answer format to help consumers choose, install and operate wood burning equipment in an economical, safe and effective way. (Charge of \$1.50 per copy for out-of-province requests.)

Wind Power

(1SBN 0-88871-008-9) A publication for the general public with factual information on the wind as an energy source; particularly for residential applications. (Charge of \$2.50 per copy for out-of-province requests.)

The Auto Pak

A pack of publications providing consumers with valuable hints for conserving motor fuel: "Car Mileage Book", Fuel Consumption Guide, 1980", "Car Mileage Tips", as well as the "Fuel Economy Calculator and Log".

The Power Pack

A pack of seven small booklets to help the consumer understand Nova Scotia's energy situation and how to conserve energy: "Energy in Nova Scotia present and Future", "Your Car", "Hot Water", "Heating Your Home", "Your Appliances", "Insulation" and "Energy Assistance Programs". (Charge of \$2.00 per copy for out-of-province requests.)

You and Your Auto

A folder of consumer information.

How to Save Energy at Home

A folder of consumer information.

Home Energy Tips - Saving Energy on Home Appliances

A folder of consumer information.

Subsidiary Agreement Energy Conservation Canada/Nova Scotia as signed July 4, 1978.

Energy Update 1978

A folder of energy consumption statistics for 1978.

Nova Scotia Energy Perspectives 1978

A comprehensive review of energy supply and demand in Nova Scotia in 1977, accompanied by historical data. (Charge of \$2.75 per copy for each request.)

Energy Alternatives Nova Scotia 1987 Respondent's Report

A Delphi Survey conducted for the Nova Scotia Energy Council (1978) by the Bureau of Management Consulting, Department of Supply and Services.

Refined Petroleum Product Requirements in Nova Scotia 1977-1997

Information was gathered from the major petroleum consumers as to how they felt their petroleum requirements would change and the factors that would influence these changes.

Before the National Energy Board Re Canadian Natural Gas Supply and Demand

Submission by: the Province of Nova Scotia, September, 1978.

Evaluation of Potential Markets for Natural Gas in Nova Scotia

Executive summary for the Nova Scotia Energy Council by Booz, Allen, September, 1978.

Before the National Energy Board in the Matter of the Export of Natural Gas to the United States of America

Submission by the province of Nova Scotia, June, 1979.

Booklet explaining the <u>Industrial Retrofitting Grant Program</u> of the Province of Nova Scotia, Department of Mines and Energy and the Government of Canada, Regional Economic Expansion.

A Case Study Wood Energy for Small Industry, Oxford, Nova Scotia

For the Nova Scotia Energy Council by Whitman, Benn and Associates Ltd. (Charge of \$10.00 per copy.)
